

HIGHLIGHTS

Eagle's Wings Preschool is a Christian preschool, focused on preparing children for Kindergarten with a play-based and active learning environment. Our teaching focuses on the whole child with social development being just as important as academic skills. Your child will learn and grow in this enriched environment.

- **Low child to teacher ratio:** Our 14:2 ratio allows personal attention, deeper relationships, and the space to work and learn together.
- **Play-based active learning:** Children learn by playing, experimenting and experiencing their world.
- **Focus on social development:** Every day, we work on skills to build friendships; work in group settings; and foster a love of learning for life.
- **Small groups:** Age-based groups provide children with fun, hands-on learning time for skills focused on Kindergarten readiness and creating a small community of friends.
- **Healthy environment:** We have a large outdoor playground and an indoor sensory path for large-muscle.
- **Encouraging creativity:** Art, music, language, and cooking opportunities are plentiful, providing children the time to express their creative passions in a supportive environment.
- **Hands-on fun:** Toys are fun! Our school is filled with toys (both classic and contemporary), books and an activity tables that give children the chance to structure their own time at their own pace.
- **Learning skills for school:** Our teachers work with a theme-based curriculum that promotes learning. Our weekly/monthly themes connect our different learning activities and integrates different learning areas, subjects, and skills together.
- **Christian Faith:** The children attend chapel every week. Children enjoy Bible stories, songs, celebrate special happenings and receive God's blessing through prayer. Classroom activities to support our weekly Chapel topic are incorporated into the preschool curriculum.
- **Loving the whole child:** Preschool children are developing important life skills. We encourage social and emotional development, cognitive learning, and large and small motor growth through loving support of each child at every stage of development.
